Prior art of record failed to teach or fairly suggest in combination the system and method for configurable profiling of data to identify an instance of fraudulent activity on a telephone system comprising receiving data from an input data stream; pre-processing the received data by performing configurable first calculations thereon to create data relating to profiling features; summarizing the profiling features data over a length of time, wherein the summarizing comprises i) *dividing the length of time into a number of non-overlapping time-slots*, ii) *storing the profiling features data in one or more of the time-slots according to time information associated with or included in the profiling features data*, and iii) *performing configurable second calculations on the profiling features data to create summarized data relating to profiled features*; and post-processing the summarized profiled features data by performing configurable third calculations thereon to create a profiled output data stream for further processing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
